PROJECTS =

- Weather app = Umbrella
Engineered a real-time data pipeline that outruns the storm.
 - Portfolio website from scratch = dishaumshaiah.com
Zero templates, pure source code, built to scale a personal brand.
 - Focus Timer = AeroFocus
Built a web app that turns standard time blocks into high-altitude flight vectors because deep-work shouldn't just feel productive—it should feel like traveling at Mach 0.85.
 - Finance tracker = Neon flow pro
High-voltage UI meets low-latency financial state management.
-

SKILLS =

- Programming: Python, Javascript, HTML, CSS, SQL
 - Technologies: React.js, Node.js, Vercel, GCP, Github
 - Professional: Leadership, Communication, Problem Solving
-

EVENTS & LEADERSHIP =

- Bright Network- IEUK 2026: Technology & Engineering JUNE 2026
Deconstructing enterprise-scale systems alongside industry leads to bridge the gap from student to engineer.
 - Adobe- Student Ambassador OCT 2025-MAY 2026
Driving technical adoption by engineering the intersection of sophisticated design and high-impact advocacy.
 - Google- EMEA Google Cloud Student Programme OCT 2025
Engineered a functional game using Google AI Studio to prove that high-level AI is the new playground for scalable software architecture.
-

VOLUNTEERING =

- Founder- The Second Table 2020-2025
Architected a real-time logistics system that transformed local food waste into thousands of community meals.
-

EDUCATION =

- Bsc (Hons) Computer Science 2025-2028
Grade: Predicted First Class Honours
